8.G: LISTS (GLOSSARY)

Contributed by Chuck Severance
Clinical Associate Professor (School of Information) at University of Michigan

aliasing

A circumstance where two or more variables refer to the same object.

delimiter

A character or string used to indicate where a string should be split.

element

One of the values in a list (or other sequence); also called items.

equivalent

Having the same value.

index

An integer value that indicates an element in a list.

identical

Being the same object (which implies equivalence).

list

A sequence of values.

list traversal

The sequential accessing of each element in a list.

nested list

A list that is an element of another list.

object

Something a variable can refer to. An object has a type and a value.

reference

The association between a variable and its value.
